

MACHINES

Single-Side Lapping Polishing & Flat Honing

The Stahli FLM series machine is the perfect addition to your production lab for lapping, polishing and single-side flat honing applications. This multipurpose series is a cost effective way to achieve the highest precision possible. You have the flexibility to use either loose abrasive or a fixed abrasive wheel on any platform. Their capabilities are ideal for both large and small manufacturing shops. Key features include: adjustable rotating speeds of the working wheel, stable bearing arrangement for quiet operation, quick adjustment of the working wheel by the center screw, slurry distribution system to maintain cleanliness, flexibility to quickly change over to other processes and integrated cooling chiller unit to keep the machine running at the same temperature constantly. The outcome that will be more production completed in a favorable amount of time. Experience absolute precision, superior quality and economic efficiency with Stahli's FLM series machine. This system can be customized specifically to customers needs. Discover the key features the FLM machine has to offer from our experts today!

FLM 500-505

Space saving dimensions while obtaining throughput productivity. Operational application is mainly concentrated on small to medium series.

FLM 750-1500

Perfect to process medium to large parts. Has the capability to run one piece at a time to large capacity batches.

FLM 1800-3250

Production machine for parts up to 1500mm in diameter. Programmable force on work pieces between 0-750daN

Special Purpose Machinery

Stahli is a worldwide leader in the manufacturing of precision flat honing, lapping and polishing machines. Our name is synonymous with the highest standards of performance, power, automation, productivity and efficiency for customers in such diverse industries as automotive, electronics, aerospace and ceramics.

The dynamic design of our ultramodern machine line ensures precision and reliability. Stahli: always user-friendly; always environmentally sound.
